Gliwice, 18<sup>th</sup> October 2012

### **The announcement of the result of the tender**

for deliver a lecture or series of lectures. Lectures aim is to increase competencies of teaching and research staff at Faculty of Chemistry at Silesian University of Technology. Project reference: UDA-POKL.04.01.01-00-114/09-01 under the title: ***"Modernization and extension of educational offer on the Faculty of Chemistry (Biochemistry Specialization) of the Silesian University of Technology – opening Specialty of Bioorganic Chemistry"***

On 16<sup>th</sup> October 2012 project Manager Prof. Wiesław Szeja decided that a special lecture will be lead by:

**Prof. dr hab. Lucjan Strękowski**

Department of Chemistry

Georgia State University

Atlanta, Georgia 30302, USA

Prof. Lucjan Strękowski was the only one who responded for invitation to tender. He presented high skills and very good knowledge from the scope of organic and bioorganic synthesis. His work is focused on the development of novel, efficient, synthetic approaches to important classes of compounds, improvements of existing synthetic methods, and application of these chemistries to the synthesis of biologically active molecules.

Professor Strękowski will deliver lectures under the title: **"Synthesis, properties and applications of near-infrared labels in bioanalytical, forensic and medicinal sciences"**.
